Rental Systems

PRODUCTION COOLING

Carrier Rental systems can provide production cooling equipment when you need it - 24/7. Carrier can either install equipment to supplement your existing on site cooling capacity or provide a stand alone process cooling system suitable for your requirements and needs.

Gain greater cooling flexibility during seasonal or peak production cooling demands without expensive capital investment by utilising Carrier Rental Systems highly invested process cooling and air-conditioning fleet.

With one call you will gain a free site survey and consultation with our experienced application teams. With the wealth of knowledge gained over many years our experts can design a system specific to your application.

If you are considering new production processes why not test these systems by using inexpensive temporary cooling solutions. Carrier Rental Systems can provide any temperature, flow or output to match any testing and production criteria.

Enhance your output and speed up production processes by adding additional cooling when and where you need it with no long lead times or expensive capital expenditure.

Vessel cooling and heating units are also available to enhance batch production processes. This application is also ideal for pilot test plants and "one off" contracts.

CONTINGENCY PLANNING

Carrier Rental Systems offers a free "Contingency Planning Service" to ensure that your cooling demands can be instantly covered in the event of failure.

TEMPORARY CHILLED STORAGE

On site temporary chilled storage will provide you with a complete cost effective and flexible solution for any storage needs.

Temporarily convert any ambient area into a fast and cost effective chill store. This instant chilled area will allow you to store goods without the inconvenience of outsourcing to expensive off site chilled storage locations and minimise associated transportation and labour costs.

Create chilled handling areas for packing or picking on your existing site to minimise costs and gain greater control of your workforce and production quality.

PEACE OF MIND

Carrier Rental Systems is supported by Carrier Corporation, the world's largest air-conditioning and refrigeration company.

With high quality and technically advanced equipment, experienced and highly trained personnel ensure that you experience the very best service and equipment. Carrier Rental Systems adopt stringent health, safety and environmental standards in all aspects of their business ensuring client's peace of mind.

Delivering a high level of service ensures Carrier Rental Systems continues to provide high quality cooling and heating packages for a wide range of critical applications worldwide.

NATIONWIDE COVERAGE

Carrier Rental Systems operates throughout the UK with additional offices worldwide. Clients who require a continuity of supply for climate control in various worldwide locations can easily be served by Carrier Rental Systems.

Experience:

Carrier Rental Systems vast experience covers a wide range of installations. This enables Carrier to provide a complete turnkey service from cost effective design and specification through to installation and operation.

The Carrier Rental Systems application team has specialist skills and knowledge to assist clients in both planning and system design.

Flexibility:

Carrier Rental Systems offers short or long term rental contracts to suit the demands of your business and minimise capital expenditure. In addition, the opportunity exists to increase the flexibility and operating efficiency by renting your air-conditioning or production cooling system.

Reliability:

All systems are designed with high levels of reliability, efficiency and performance as a must. This provides you with minimum running costs and maximum operational benefits.

Part of Carrier Corporation
