

For industrial and manufacturing temperature control rental...

...turn to the rental experts

Carrier Rental Systems has many years experience supplying temporary cooling systems and equipment to the manufacturing industry, providing clients with flexible, cost effective and high value solutions.

All projects are supported by a complete service from system design, equipment installation, 24hr maintenance cover and decommissioning on completion.

Complete temporary climate control solutions from the industry's experts.

Rental Systems

TEMPORARY CHILLERS

Carrier Rental Systems can provide temporary cooling when your business needs it, with immediate 24hr availability in the event of a breakdown or planned maintenance period. By renting, you can increase on-site cooling to cover the peak summer months with no capital cost, enabling you to meet immediate production demands with a quick complete solution.

Rental equipment can give your business the ability to utilise additional cooling to maintain or increase production and profits as well as provide increased capacity when it is required with no cooling constraints. Easy to install with flexible high pressure hoses and quick connect couplings, Carrier Rental Systems looks after all elements of the installation and provides 24hr cover during the rental period.

PEACE OF MIND

Carrier Rental Systems is a key division of the Carrier Corporation which means that all the benefits of the worlds leading refrigeration company are available on a short or long term rental basis.

Quality of equipment and personnel, constantly enforcing health and safety systems and having a real interest in the care of the environment are all a high priority within Carrier Rental Systems.

These measurable criteria along with constantly delivering high levels of service ensures the company continues to provide high quality rental cooling and heating packages to a wide range of critical applications worldwide.

TEMPORARY AIR-CONDITIONING / HEATING

Carrier Rental Systems can provide temporary air-conditioning units from 2kW to 5,000kW. These can either be used as a stand alone system or to supplement existing on site capacity.

With a complete package of chillers, boilers and air handling units available, Carrier Rental Systems is able to provide you with a permanent specification air-conditioning or heating system on a temporary basis.

Hot water boilers are available from 50kW to 2,000kW for rental during maintenance or lead time periods, and are easy and quick to install with simple operation. All rental equipment can be supported by a range of ancillary items which when combined, provides a range of flexible and bespoke heating and cooling packages.

CONTINGENCY PLANNING

Use the free contingency planning service to ensure that your cooling demands can be immediately covered by Carrier Rental Systems equipment in the event of failure.

NATIONWIDE COVERAGE

Carrier Rental Systems operates throughout the UK with additional offices worldwide. Clients who require a continual supply of climate control in various worldwide locations can easily be served by Carrier Rental Systems.

Experience:

Carrier Rental Systems vast experience covers a wide range of installations. This enables Carrier to provide a complete turnkey service from cost effective design and specification through to installation and operation.

The Carrier Rental Systems application team has specialist skills and knowledge to assist clients in both planning and system design.

Flexibility:

Carrier Rental Systems offers short or long term rental contracts to suit the demands of your business and minimise capital expenditure. In addition, the opportunity exists to increase the flexibility and operating efficiency by renting your air-conditioning or production cooling system.

Reliability:

All systems are designed with high levels of reliability, efficiency and performance as a must. This provides you with minimum running costs and maximum operational benefits.
