Products

A comprehensive fleet. Quality equipment, high stock levels and solutions for the widest range of applications.

- Liquid chillers for process and production cooling – from 30 kW to 5000 kW
- Low noise chillers for noise sensitive applications – from 50 kW
- Dry air coolers – up to 5000 kW
- Cooling towers – from 1000 kW
- Heat exchangers – from 50 kW
- Air-conditioning units – from 2 kW to 5000 kW
- Air handling units – from 15 kW to 500 kW
- Temporary chill stores – internal or external
- Portable blast chilling units – internal
- Boilers for process and production heating – from 200 kW
- Air to air heaters – from 20 kW
- Dedicated event, hospitality and film/TV climate control packages
- Generators, cable and distribution packages for any requirement
- Temporary ice rinks for any situation

A complete package of ancillary equipment to facilitate any installation. More information or an immediate project response can be requested from our freephone number:

Formerly CRS - Chiller Rental Services

Rental Systems

Talk to the experts in temporary temperature control solutions. We can provide the fastest possible answers, followed by rapid equipment delivery to wherever it's needed in the UK.

Liquid chilling, air-conditioning, air to air heating, and hot water supply are vital to businesses everywhere and we can supply equipment that will help you to sustain and maximise performance.

We deliver a complete service package that deals with all the elements of the rental solution from design, through installation to decommissioning.

Greenwich Ice Rink 08. Carrier Rental Systems provided a complete package of 3 x 450kW chillers, 2 x 500 kVA silenced generators plus ancillary equipment

North East Chemical Processing Plant. Carrier Rental Systems provided a package of 3 x 2000kW cooling towers and 3 x high head circulation pumps during a planned maintenance period.

Technical expertise – planning and analysis

Coping with customers' emergency requirements is an everyday occurrence for us and our service delivery is geared to match. Of course, the earlier we can have a dialogue and begin to plan the better.

Whatever the need, our specification teams analyse every project to ensure that the equipment solution is tailored to meet the circumstances, precisely. Dedicated account management, free site surveys and contingency planning services complete the picture.

Service delivery – ready to supply, right place, right time

Our equipment is drawn from a large, highly invested rental fleet. Our own experienced engineers service and maintain the equipment and test it prior to mobilisation.

Carrier Rental Systems' installation teams provide the reassurance that on-site we can deliver, install, optimise performance and de-install with the minimum fuss and maximum efficiency. An extensive package of ancillary equipment includes quick connect pipe work and hoses to permit the fastest possible installation with minimum downtime to your operation.

Support – 24 hours, 365 days a year

We provide support to your on-site staff, or supply a service from our own dedicated technicians based all over the UK. We can also locate standby machines on site or hold dedicated equipment for emergency cover.

Range of applications

To match the reputation of Carrier's manufacturing expertise in chillers and air-conditioning equipment, Carrier Rental Systems provides superior technical solutions to cooling and heating applications of all types throughout the UK.

Our specialist application knowledge enables us to assist clients in the design of systems to match any requirement. We pride ourselves on our ability to design packages of equipment, which enhance our client's processes and business – output could be increased and energy efficiency improved.

We have a range of high specification equipment which is selected to be flexible, low noise, compact and, above all, efficient in performance. We can confidently approach any project with the knowledge that we can apply the correct equipment cost-effectively.

Whether you require a critical 1000 kW process cooling system, operating at -15°C or a 200 kW air-conditioning system to cool a film studio, Carrier Rental Systems will supply the right equipment, with the right service at the right time.

Farnborough Air Show. Carrier Rental Systems provided a package of over 12mW of air-conditioning and power.

Total project management

Carrier is known for innovation. At Carrier Rental Systems this is very much the case with our fleet, and with ancillary products and services.

We are able to enhance our core fleet of chillers, air handling units and boilers with innovative packages of services that can facilitate the installation of the rental equipment in a timely, efficient and cost effective manner.

Our turnkey management capability enables us to make any project stress-free for our customers. We are used to managing road closures and crane lifts as well as providing scaffold platforms and safety fencing.

We can also supply additional items that can be critical to client systems such as heat exchangers, pumps and manifolds. In addition, we regularly undertake diesel fuel management to support our own silenced power generators.

EH&S and quality management

As part of a large global corporation, our systems of corporate governance, quality control, ethical behaviour and environmental responsibility are of the highest standard.

Stringent EH&S procedures give clients the peace of mind of knowing at all times that Carrier Rental Systems will protect our teams, you and your clients. These Health and Safety systems are backed by training and regular audits. This process includes the provision of a Safety Passport for all engineers, the use of comprehensive method statements and risk assessments, prior to commencing work.

Contingency planning - Disaster Avoidance Programme

This supports clients' risk management processes, all over the UK, in preparing their cooling and heating systems to be ready to switch to a temporary or back-up service without major adjustment or costly re-engineering. This will minimise your system downtime.

These plans are always customised, but the solutions are tried and tested. Carrier Rental Systems is a safe pair of hands.
